To

Senior Human Resource Manager,

Thilak Samarasekera,

The Lanka Hospitals Corporation PLC,

Sri Lanka.

**Dear Sir,**

## **Applying for Medical Laboratory Researcher position.**

I am submitting my resume for the position of Medical Laboratory Researcher. My resume contains details about my skills and experiences.

I have just completed my six months internship at Asiri Hospital after completing my degree in Bachelor of Science (Hons) in Biotechnology at Sri Lankan Institute of Information Technology university. I am confident about my knowledge as I have learned and experienced a lot during my internship.

Lanka hospital has been a leading hospital in Sri Lanka. I would like to implement my skills and experiences in this hospital to improve my skills and mainly to be a part of medical laboratory community. Apart from my knowledge, I have an outgoing and friendly personality. So, I can work in laboratories as well as in other positions within this industry.

Thank you for considering my application. I am hoping to meet you in person very soon and to align with the needs of your team.

Sincerely,

S. Keshika
